## SOLAR STREET LIGHT 20W

All in one, integration design put solar panel, LED lamp, battery and controller all in one box without any cadle, easy to install and ship longer service life...

Easy to maintain and replacement...

Solar panel, battery and LED lamp are all in one, which is waterproof. The shell is made from aluminium alloy, cooperating with good waterproof and airless technology. Dustproof, waterproof, anti-static, shocking resistance, be applicable for out doors. Be convenient to be dismantled, assembled, carried and transported. High-efficient sola panel of 19W supplies power for lithium battery of 12V 10AH which is explosion-proof and heat resistant. Ultra white glass with high light transmittance cloth is used as lens, which makes the light gentle. The lumen of whole lamp is more than 1400lm. The life span of LED is 50000 hours. When the temperature raise up to 50°C under the sun, the fan inside automatically starts to reduce the temperature and be ventilated. High-efficient power generation, large capacity, high light efficiency, small volume, light weight, long life span, convenient carrying. It can be lighted for 7 to 9 hours when shined of a whole sunny day. Flexible stand can be raised to 1 to 2 meters high. The lamp head can be rotated 360° flatly and be adjustable 180° uprightly, which is designed to get light around.
